

TITANTEK™ LARGE BOXRIB (LBR) VariPanel™

VariPanel™ is a system of similar profile architectural metal claddings that can be used interchangeably, varied, staggered, or randomized by color or profile, allowing designers the freedom to create their own unique and durable exterior aesthetics.

The LARGE BOXRIB VariPanel system features three (3) panel profiles in a very popular box rib aesthetic. Oversized ribs create a deeper reveal that will stand out from a distance, creating deeper shadows and increasing rib distinction. Combine these panels in a pattern, different colors, or install them randomly to create a unique aesthetic.
