

TITANTEK™ TSP-12 Panel

The TitanTek TSP-12 panel is designed for horizontal applications and emulates a traditional vinyl or wood siding profile. TitanTek's one-piece connection design allows for simple and easy installation without brackets. This concealed fastener profile eliminates exposed penetrations for longevity and aesthetics and is engineered to be installed over solid substrate or open framing. Standard coverage for the panel is 12" with options for custom panel widths.

The TSP-12 panels are offered in all TitanTek standard finishes as well as Bonderized, A606 Corten, and Galvalume Plus finishes.

Applications:

Horizontal or Vertical Installations
Residential, Commercial, Agricultural
Installs Over Solid Substrate or Open Framing

Accessories:

Color Match Sealants
Ice and Water Shield Underlayment

Standard Width	Materials	Available Lengths
