

TITANTEK™ ANGULAR VariPanel™

VariPanel™ is a system of similar profile architectural metal claddings that can be used interchangeably, varied, staggered, or randomized by color or profile, allowing designers the freedom to create their own unique and durable exterior aesthetics.

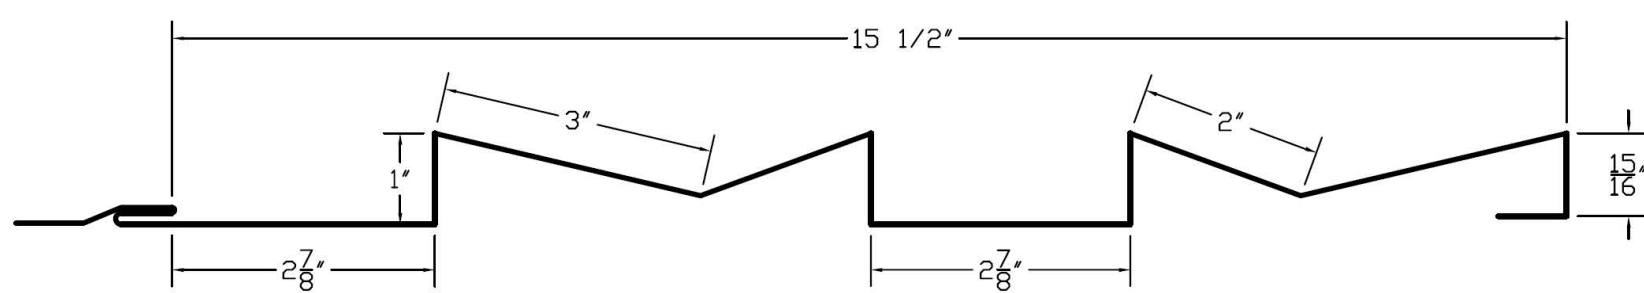

The ANGULAR system features two (2) panel profiles in both concave and convex configurations. Use both separately or together, these two panels will create unique eye-catching shadow lines and interesting aesthetics. With a vast assortment of colors and textured finishes in 40-year PVDF coatings, use both panel profiles together or in any order to make your lasting, low-maintenance exterior stand out from the rest.
